

GENIUS UF1

**The machine may be different than the picture*

Genius UF-1 is a flexible, small-sized finishing unit for everyone working in the textile sector and in digital printing in particular, which allows manufacturers to autonomously carry out the final step of the printing process.

GENIUS UF-1 FEATURES:

- a heating and steaming system ensures homogeneity during color fixation.
- a timed fabric rotation ensures homogeneous fixation;
- it uses steam valves of the latest generation for maximum safety
- it is equipped with the latest alarm and programming systems;
- it can be filled with water either manually or by connection to the water supply
