

## DRYING SYSTEM

Drying machine based on infra-red technology

*\*The machine may be different than the picture*

Top Digitex drying systems are based on infra-red technology and could be sized on customer request. The infra-red technology consists of lamps or panels with different thermal inertia and irradiation power. Machine characteristics can be defined based on dimensions, speed and drying capacity required.

The machine includes: roll to roll system to dry the fabric, iron and ironing board

FABRIC DIMENSION	180 cm
INFRA-RED POWER	6 kW
FABRIC CAPACITY	20 m
