

## FOAM MATERIALS PRINTING LINE

\*The machines may be different from the ones shown here.

The line includes control and management systems for fabric traction, systems for unwinding and rolling large rolls, and head printing systems capable of handling thick materials and distances up to 7 mm.

Coated fabrics can change the tension and resistance, for this reason attention in the development of a printing line has moved towards flexibility and the possibility to adapt to diverse types of materials.

### FEATURES:

- Unwinding system
- Pre-treatment
- Head system for thick materials
- Drying system
- Winding system

The pre-treatment and drying systems can be customized to meet customer needs.
